

## ***Project Development - Delivery of Sprint-4***

<b>Project Domain</b>	Cloud Application Development
<b>Project Title</b>	News Tracker Application
<b>Team ID</b>	PNT2022TMID44585
<b>Date</b>	19th Nov 2022

### ***Sprint-4 Deliverables***

1.Containerized the application using docker desktop and pushed the image file to dockerhub.

2.Pushed the docker image file to the ibm cloud container registry.

3.Deployed the image file from container registry to the Kubernetes.

Docker playground commands:

- docker pull sriramrmx/cad
- docker run -p 5000:5000 sriramrmx/cad

Kubernetes deployment:

- IP/Port Number: 159.122.187.10:32251
- Website address: <https://newstracker.ml/>

Figure-1: Creating images using Docker

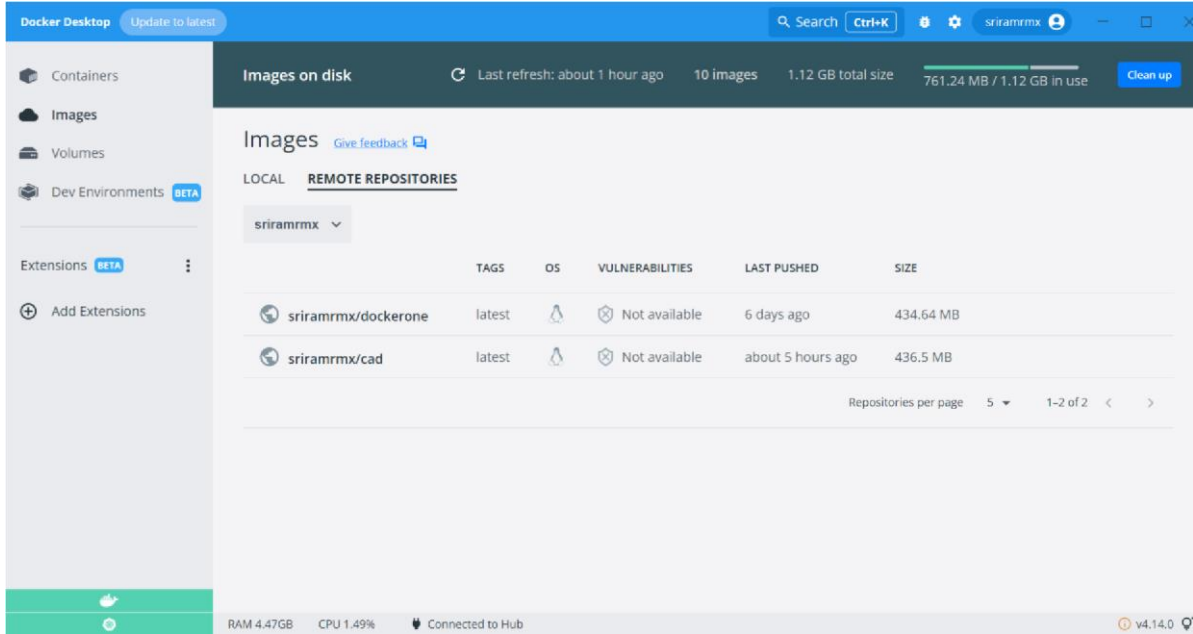

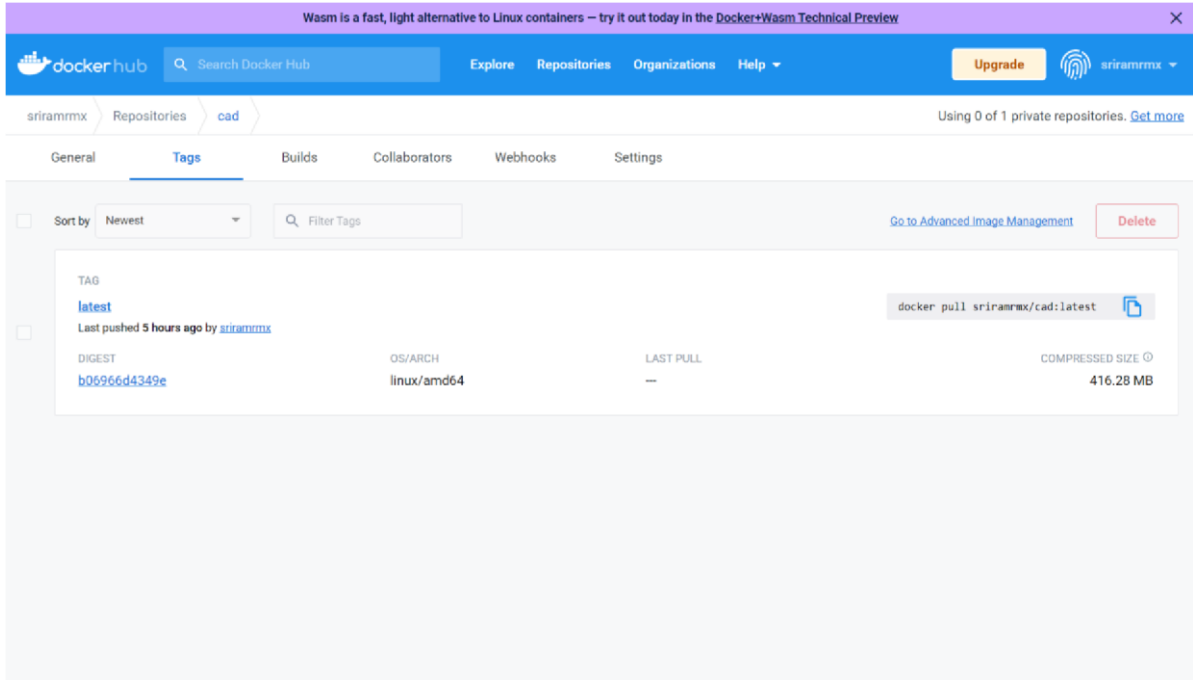

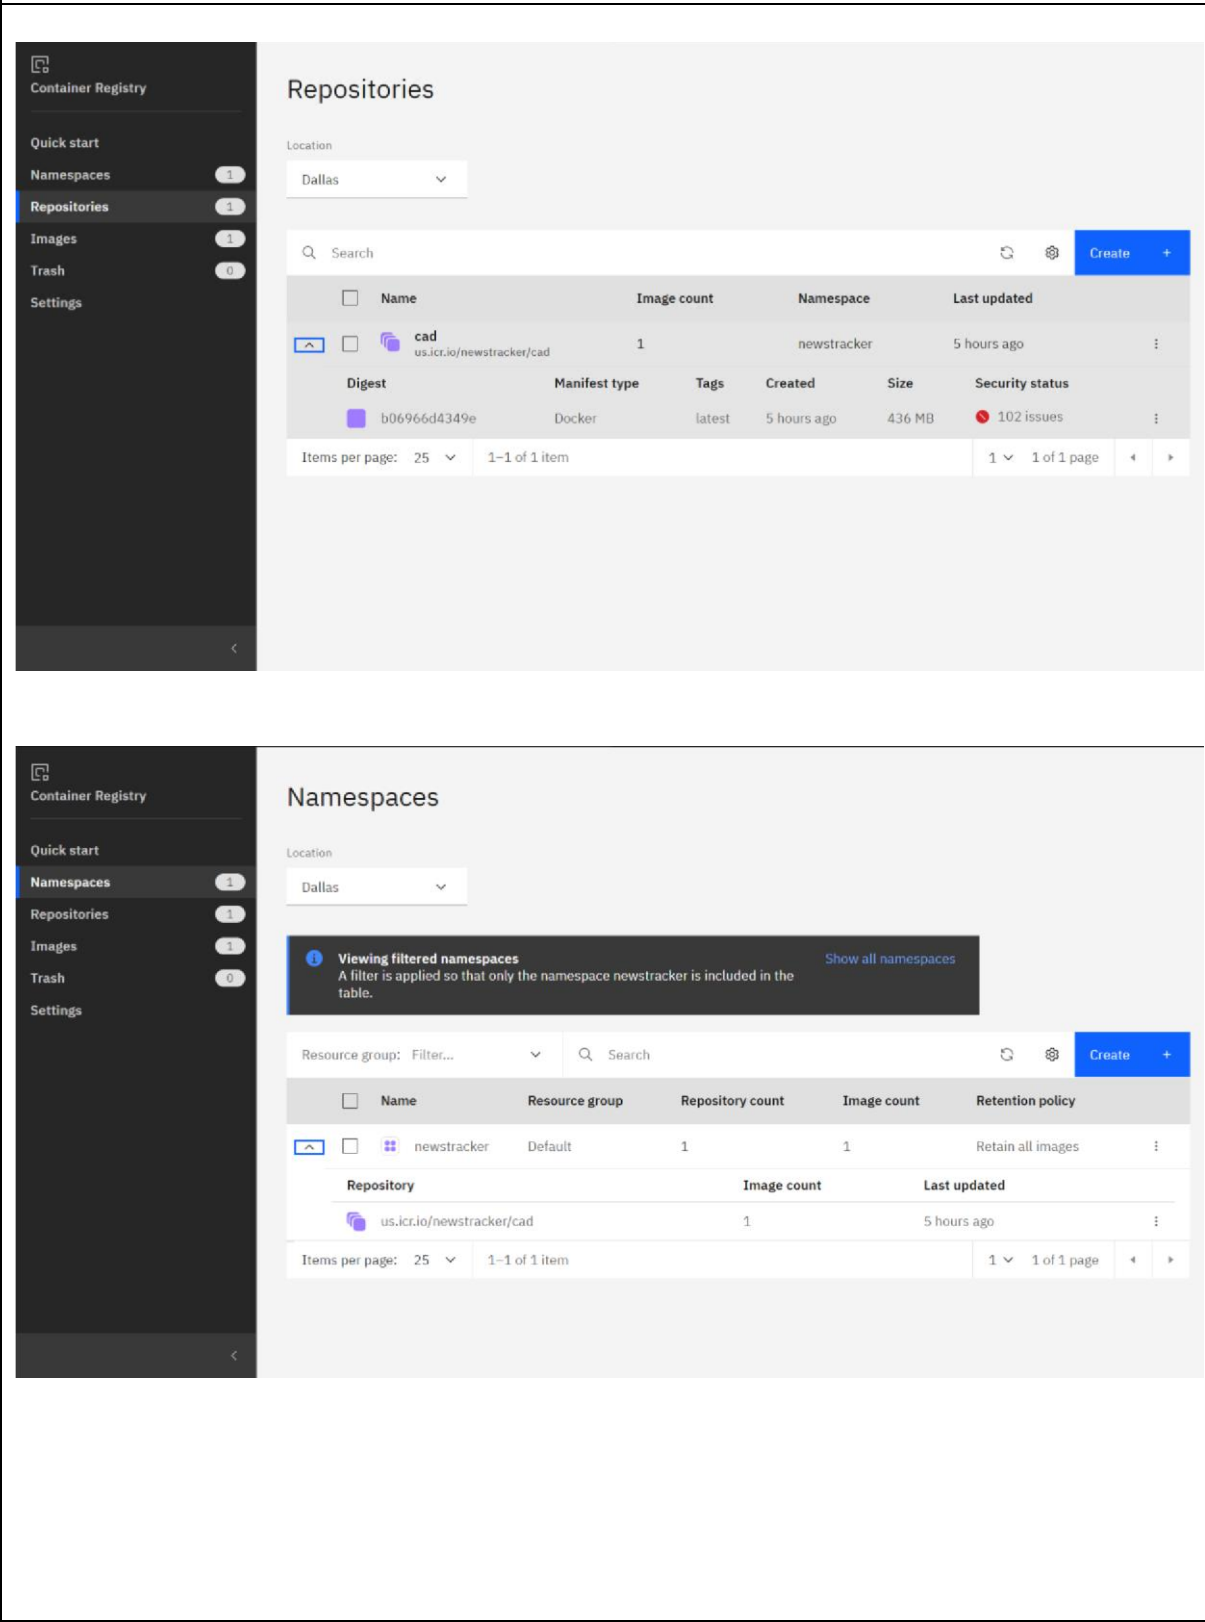

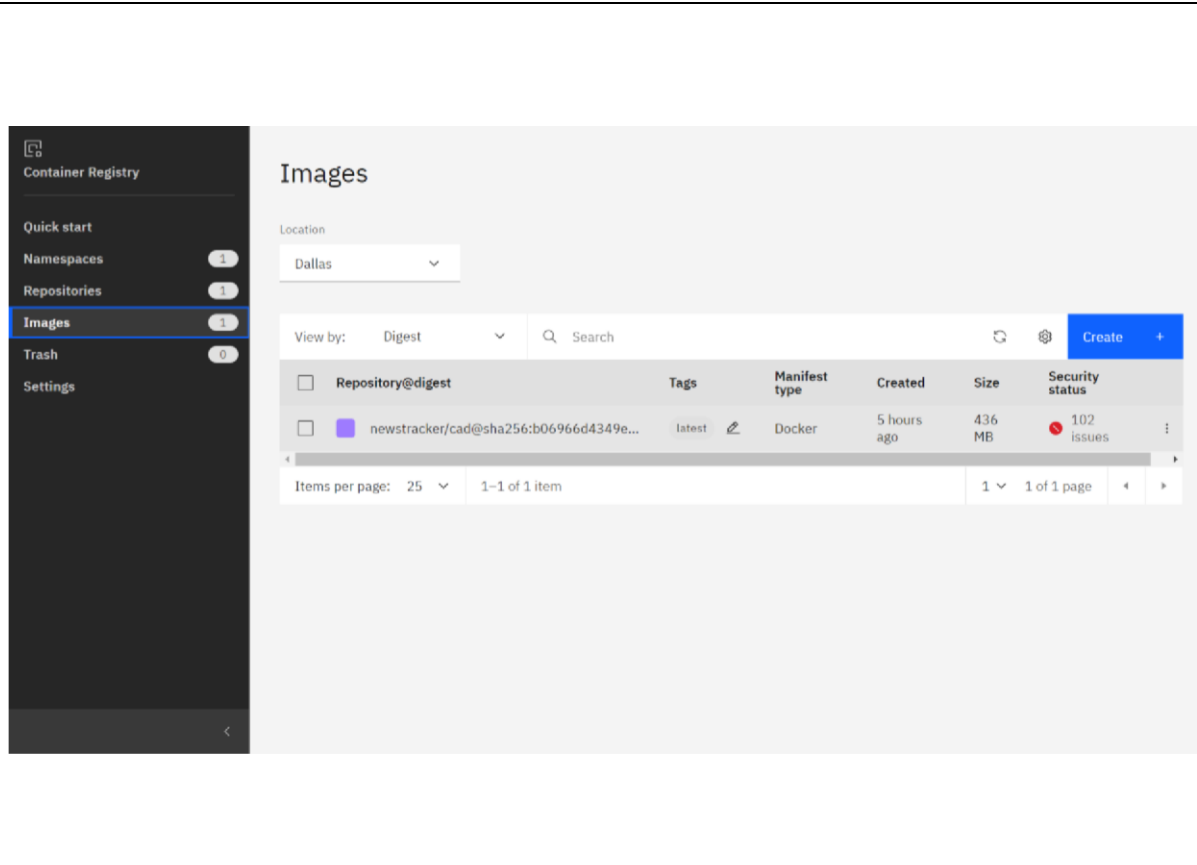

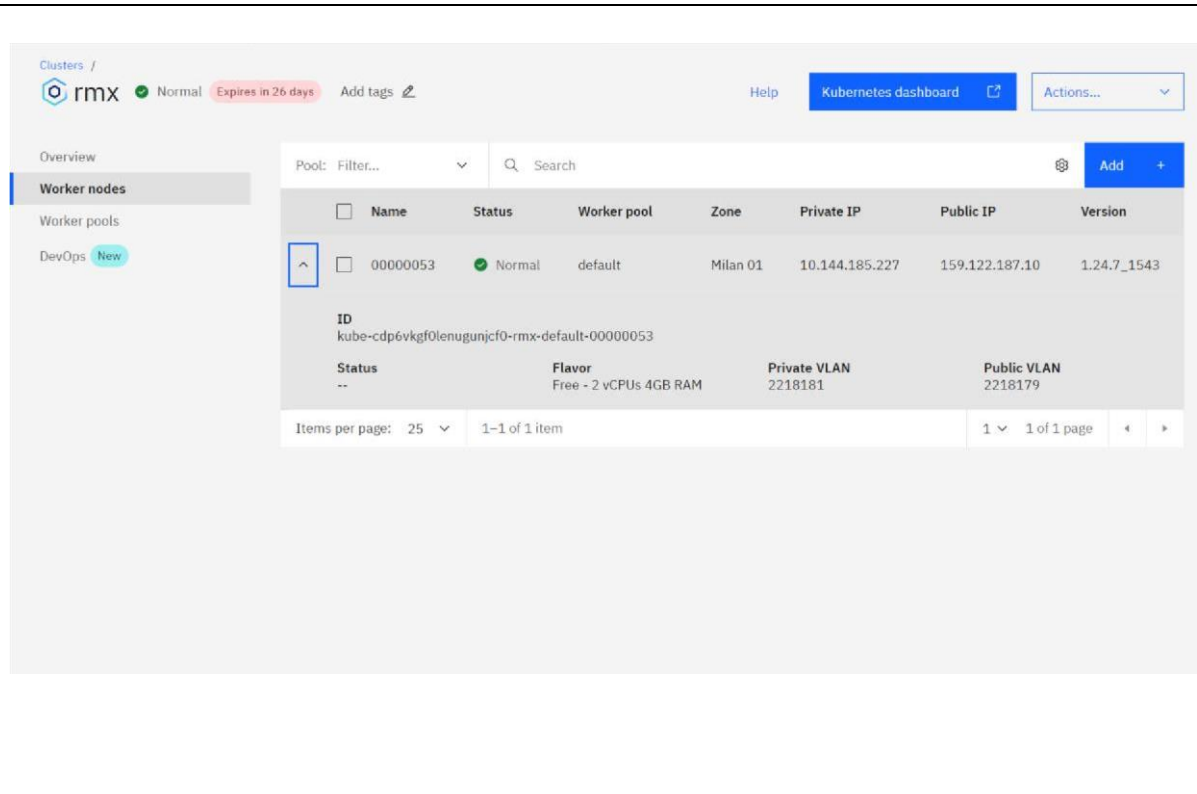

Figure-2: Uploading image file to ibm cloud container registry

**Figure-3:** Deploying the image file in ibm cloud container to the ibm Kubernetes cluster
