# **ASSIGNMENT-II**

# FLASK PROGRAM

DATE	10.11.2022
TEAM ID	PNT2022TMID44585
MAXIMUM MARK	2

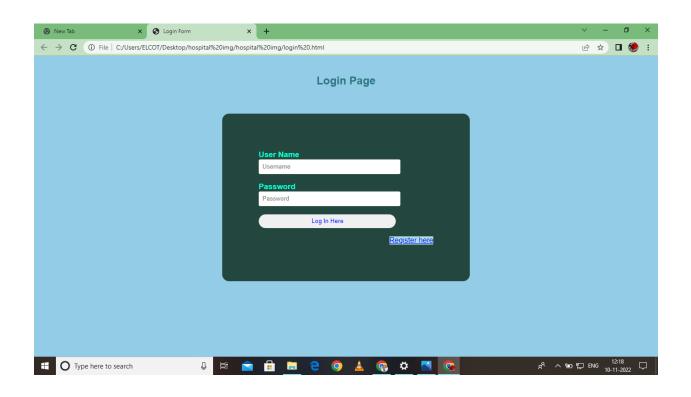

1) Write a Flask Program Which Should Display Name, Email, Phone and it Should Display the Same Once We Hit Submit.

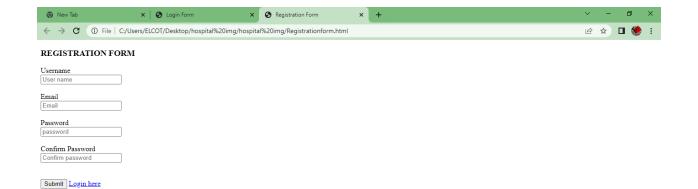

## **CODE:**

```
from email.mime import image
from flask import Flask, render_template, request, redirect, url_for, session
import ibm_db
import re
app = Flask(__name__)
conn=ibm_db.connect("DATABASE=bludb;HOSTNAME=b1bc1829-6f45-4cd4-bef4-
10cf081900bf.c1ogj3sd0tgtu0lqde00.databases.appdomain.cloud;PORT=32304;PROTOCOL=TCPIP;SECURIT
"", "")
@app.route('/')
@app.route('/login', methods =['GET', 'POST'])
def login():
   msg = ''
    if request.method == 'POST' and 'email' in request.form and 'password' in request.form:
        username = request.form['email']
        password = request.form['password']
        stmt = ibm_db.exec_immediate(conn,'SELECT * FROM DEMO WHERE email = % s AND password =
        account = ibm_db.fetch_both(stmt)
        if username==password:
            session['loggedin'] = True
            session['id'] = account['id']
            session['email'] = account['email']
            msg = 'Logged in successfully !'
            return render_template('index.html', msg = msg)
        else:
```

```
msg = 'Incorrect username / password !'
    return render_template('login.html', msg = msg)
@app.route('/register', methods =['GET', 'POST'])
def register():
   msg = ''
    if request.method == 'POST' and 'username' in request.form and 'password' in request.form
        roll_no = request.form['roll_no']
        username = request.form['username']
        password = request.form['password']
        cpassword = request.form['cpassword']
        email = request.form['email']
        conn=ibm_db.connect("DATABASE=bludb; HOSTNAME=54a2f15b-5c0f-46df-8954-
7e38e612c2bd.c1ogj3sd0tgtu0lqde00.databases.appdomain.cloud;PORT=32733;PROTOCOL=TCPIP;SECURIT\
"", "")
        stmt = ibm db.exec immediate(conn, 'SELECT * FROM DEMO')
        if email==cpassword:
            msg = 'Account already exists !'
        elif not re.match(r'[^@]+@[^@]+\.[^@]+', email):
            msg = 'Invalid email address !'
        elif not re.match(r'[A-Za-z0-9]+', username):
            msg = 'Username must contain only characters and numbers !'
        elif not username or not password or not email:
            msg = 'Please fill out the form !'
        else:
            sql=ibm_db.exec_immediate(conn,'INSERT INTO DEMO (roll_no, username, email, passwo
            msg = 'You have successfully registered !'
            print("you have successfully registered!")
            return redirect(url('/login'))
    elif request.method == 'POST':
            msg = 'Please fill out the form !'
    return render_template('signup.html', msg = msg)
if name ==' main ':
    app.run(debug=True)
```

#### **OUTPUT:**

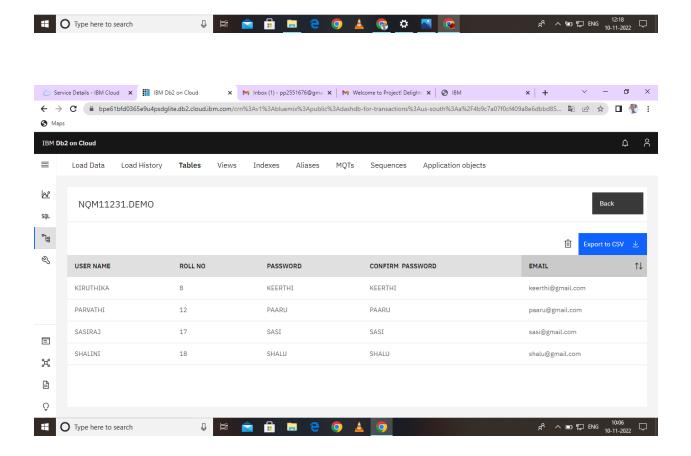

#### **WELCOME**

2) Write a Flask Program Which Should Cover Cookies, Sessions. **COOKIES:** 

```
from flask import request

@app.route('/')
def index():
    username = request.cookies.get('username')
    resp = make_response(render_template(...))
    resp.set_cookie('username', 'the username')
    return resp
```

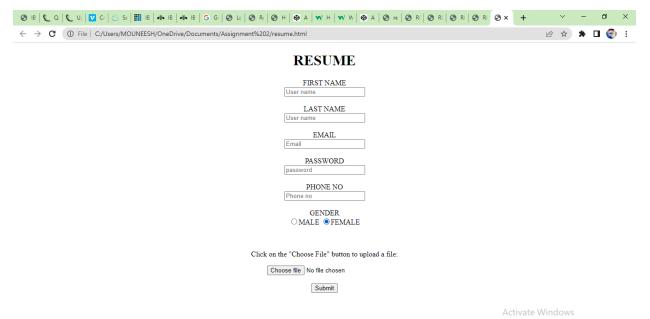

## **SESSION:**

```
@app.route('/')
def index():
    if 'username' in session:
        return f'Logged in as {session["username"]}'
    return 'You are not logged in'
@app.route('/login', methods=['GET', 'POST'])
def login():
    if request.method == 'POST':
        session['username'] = request.form['username']
        return redirect(url for('index'))
    return '''
<form method="post">
<input type=text name=username>
<input type=submit value=Login>
</form>
@app.route('/logout')
def logout():
    session.pop('username', None)
   return redirect(url for('index'))
```

3) Write a Flask Program Which Should Display Resume Detailes Also have Upload Resume option by Using File Uploading.

```
<!DOCTYPE html>
<html>
    <head>
        <title>RESUME</title>
        <meta name="viewport" content="width-device-width,initial-scale=1.0">
        <link rel="stylesheet" href="style5.css">
    </head>
    <body>
        <div class="wrapper">
            <div class="inner">
                 <form style="justify-content: center;">
                     <h1>
                         <b>RESUME</b></h1>
                     FIRST NAME
                     <div class=""form-wrapper">
                         <input type="text" placeholder="User name" class="form-</pre>
control">
                     </div><br>
                     LAST NAME
                     <div class=""form-wrapper">
                         <input type="text" placeholder="User name" class="form-</pre>
control">
                     </div><br>
                     EMAIL
                     <div class=""form-wrapper">
                         <input type="text" placeholder="Email" class="form-</pre>
control">
                     </div><br>
                     PASSWORD
                     <div class="form-wrapper">
                         <input type="password" placeholder="password"</pre>
class="form-control">
                     </div> <br>
                     PHONE NO
                     <div class="form-wrapper">
```

```
<input type="Phone no" placeholder="Phone no"</pre>
class="form-control"></div><br>
                    GENDER
                         <div class="form-wrapper">
                      <input type="radio" placeholder="male"class="form -</pre>
control">MALE
                      <input type="radio" placeholder="female"class="form-</pre>
control">FEMALE
                     </div><br><br>>
                     Click on the "Choose File" button to upload a file:
                 <input type="file" id="myFile" name="filename"><br><br>
                  <input type="submit">
       </center>
    </form>
            </div>
        </body>
</html>
```
